PROFILE

Web Developer with experience in HTML, CSS, JavaScript, and React. I build responsive, user-friendly websites, focusing on clean code and efficient performance. Ready to apply my skills to create effective solutions.

PROJECTS

1. DRIVEEASE
Technologies: React JS
Description: Developed a fully responsive car rental website that includes vehicle cards and booking forms for users to select and rent vehicles. The frontend logic is managed using React hooks like useState and useEffect.The user-friendly design is optimized for mobile and desktop views.

2. STUDY SYNC
Technologies: HTML, CSS
Description: Created a fully responsive website as a learning project. Focused on implementing best practices in HTML & CSS to ensure cross-device compatibility and an optimal user experience

3. PETX
Technologies: HTML, CSS, JS, PHP
Description: Built PETX, a PHP-based website dedicated to dog care. Designed and developed various features to provide information and resources for dog owners, including care tips and a user-friendly interface.

CERTIFICATIONS

Cybersecurity   *~On Campus, Mahesh Rakheja*
Completed a comprehensive course on Cyber Security, covering key principles and practices to protect systems and data from cyber threats.

Data Science with Python   *~Excellence Technology, Mohali*
Earned certification in Data Science with a focus on advanced technologies and techniques for data analysis. Completed a project on a movie recommendation system, applying machine learning algorithms to suggest films based on user preferences.
